SESSION PLAN

Unit Code and Title:	**TAEDEL511 Facilitate e-learning**
Session number:	**2 Setting the Digital Stage: Preparing for E-Learning**
Trainer's name:	**Marie G.**
Date:	**14/03/2026**
Duration:	**6 hours**
Location:	**The Training Academy of Excellence**

Learning Objective/s:

By the end of this session, learners will be able to:

- Check organization rules and training strategies for e-learning.
- Plan a logical flow of digital activities and manage risks.
- Identify when and how to get extra support for student literacy or digital skills.

Facilitation Method:

- Collaborative Brainstorming & Discussion
- Analysis of Regulatory Documents
- Scenario-based Problem Solving

- Hands-on Digital Mapping

Resources needed:

- Session Presentation: PowerPoint
- Technology: Video conferencing platform (Zoom/Teams) with breakout room functionality, white board or interactive board, projector and internet access.
- Digital Whiteboard (Miro, or native Zoom/Teams whiteboard), whiteboard and projector. Internet access.
- Shared Document (Google Shared Doc, Google forms, matrix template)
- Administrative Docs / links: Organizational e-learning procedures and policies. LLND framework guides (handout). RTO Support Directory. (see activities)
- Scenario cards for activities.

Learning Support

For Shammim (Thinking/Applying): High-level academic frameworks and direct links to the Standards for RTOs. Shammim's academic background as an Assistant Professor means she will appreciate the "Why" behind the "How."

For Abbey (Leadership): Opportunities to lead group discussions on risk management. Abbey's goal is management; this session focuses on the "Oversight" of e-learning.

For Sian (Practical/Technical): Practical templates for "Support Plans." Sian prefers building skills; providing her with a tangible "Intervention Plan" template will keep her engaged.

Learning Environment

A physical meeting room equipped with a board and projector for the theory components. Access to a digital workshop space (laptops/tablets) to interact with e-learning training plans and organizational policies.

Session Structure and Timings

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary

Time	Topic / Activity	Content / trainer instructions	Learning Activities / Formative Assessments	Resources
1h	The Rules Reviewing Org procedures, the TAS, and the Unit of Competency.	**Trainer:** Presentation: Reviewing Org procedures, the TAS, and the Unit of Competency. Explain how the TAS dictates the "Target Group" and how the Unit of Competency defines the "Standard of Performance."	**Learners engage in a discussion:** "Before we click 'start,' we need to know the rules. Where do we find our organization's e-learning policy? Why is it vital to know who our target group is before designing the course. Why must our digital content match the Unit of Competency exactly? **Activity:** Learners navigate	PPT for presentation For the Activity provide digital copies of Sample TAS, RTO Policy, and a Unit of Competency.

			organizational procedures to find specific e-learning rules.	
1h 30mins	Creating the Learning Map	**Trainer presentation:** Ensuring "Logical Progression." **Logic**: How to sequence events so students don't get lost. **Continuity**: Keeping the "momentum" alive across digital modules. **Discussion:** "What happens to a student's progress if the content is out of order or too jumpy?".	**Learners** **AT2: Class small group exercise creation of a short e learning training plan** Sequencing activities into a logical "Learning Path." (Storyboard Mapping). Learners use either digital or physical cards to map a 30mins session sequence based on a UoC. Then they present the session and discuss their storyboard mapping and sequencing of activities. **The Goal:** To develop an e-learning training strategy that	PPT for presentation Trainer provides appropriate UoC samples based on learners' industries. Learners to decide on which UoC they will use for this activity. For the activity: Digital whiteboard tool with pre-loaded digital post it notes (e.g., Miro), "Activity Cards" (Quiz, Video, Forum etc). Alternatively, physical post it notes and a flow chart template.

			manages and sequences activities to ensure a logical progression of content and learner progress **Class discussion:** "How do we keep students from getting bored? Does the order of activities matter?"	
1h 30mins	Spotting the Red Flags	**Presentation: Managing "The What-Ifs."** Constraints: Identifying tech/time limits. Risks: Spotting digital behavioural clues vs. classroom body language. **Technical Constraints:** Hardware/Software: Does the	**Learners** **Activity:** "What If?" Workshop (Risk & Constraint Analysis) Groups brainstorm technical and personal risks. The Trainer should prepare 3–4 short "Scenario Cards" based on different learner profiles (e.g., a remote worker with	PPT presentation Risk Matrix Template to rank the issues. Case Study scenarios (cards) of common e-learning issues. The Mitigation Register: A basic 3-column table: Risk, how bad is it? Solution.

		learner have a device that meets the technical requirements of the e-learning environment? **Internet Stability:** Will a poor connection prevent them from attending a synchronous (live) 1-hour session? **Digital Literacy:** Does the learner have the "Digital Literacy" foundation skills to use the electronic tools and navigate the learning objects? **Personal Constraints** **Time & Space:** Does the learner have a quiet, safe environment at home or work to focus on e-learning?	poor internet / a learner who is new to digital tools / a learner showing inappropriate behaviour etc.) to ensure the brainstorm remains realistic and industry-relevant. **Activity Breakdown:** Identify: Groups brainstorm potential "roadblocks" in two categories: **Technical:** (e.g. low digital literacy). **Personal:** (e.g., Distractions at home, loss of motivation). **Assess:** Teams place these risks on a Risk Matrix to determine the Likelihood vs. Impact.	

		Work/Life Balance: Are there workplace pressures or personal commitments that limit their "continuity of progress"? **Risks to Learner Wellbeing** The "Silent" Learner Tone Shifts Inappropriate Behaviours	**Mitigate:** Groups draft one practical solution in a Mitigation Register.	
1h 30mins	The Safety Net	**Trainer** **Presentation:** Identifying LLND (Language, Literacy, Numeracy, Digital) needs. Knowing the "Scope of Role" (when to help	**Learners** Discuss LLND support **Activity Scenario based group work**	PPT presentation Scenario: Alex's profile RTO Support Directory: A mockup (or real) list of organizational contacts so

		vs. when to refer to a specialist). **Discussion:** "Not everyone is a digital native. How do we identify if a student needs help with basic computer skills or literacy? When is a problem 'out of our hands,' and where do we go to find specialist support for them?"	The trainer provides learners with Alex's profile, A detailed one-page scenario describing Alex's behaviours (e.g. non-attendance, forum frustration, and disclosed disability). The learners must complete a formal Intervention Table that separates Alex's issues into "Technical Constraints" (e.g. LMS navigation/PDF access) and "Complex Needs" (disability-related reading difficulties). The goal is for learners to prove they can differentiate between a "tech" fix and a "pedagogical" support need. They act as the facilitators to	learners know who the specialists are. LLND framework guides (handout) Individual Support Plan template (Shared doc)

			bridge the gap between Alex's current struggle and the course requirements.	
30mins	Exit Ticket	**Trainer** They summarise how organizational rules, risk management, and student support pathways connect to form a professional e-learning foundation. Additionally, they provide a "Self-Reflection Checklist"	Learners They will complete a brief "Reflect and Improve" checklist focusing on three key areas: **Regulatory Awareness:** "Am I confident in finding and applying the 'rules' (TAS/Policies) to my digital delivery?" **Risk Mitigation:** "Can I accurately spot a 'Silent Learner' or a 'Tone Shift' and do I know the professional boundary for intervention?"	

			Support Pathways: "Do I know exactly when to handle a student issue myself and when to refer them to a specialist?"
