The Training Academy of Excellence

SESSION PLAN

Unit Code and Title:	**TAEDES513 Design and develop e-learning resources**
Session number:	**1** ***Foundations of E-Learning Design: Getting Started***
Trainer's name:	**Marie G.**
Date:	**14/03/2026**
Duration:	**6 hours**
Location:	**The Training Academy of Excellence**

Learning Objective/s:

By the end of this session, learners will be able to:

- Clarify the purpose and mode of delivery (synchronous/asynchronous) for a specific e-learning resource.
- Analyse target group characteristics to identify foundation skill and support needs.
- Interpret nationally recognized training products to extract core skills and knowledge requirements.
- Apply organizational procedures, including branding and intellectual property requirements, to the preparation phase.

Facilitation Method:

A blended facilitator-led approach focusing on constructive alignment. The session will move from theoretical frameworks to high-engagement practical application.

Collaborative Inquiry: Facilitated group discussions to share industry experiences.

Active Learning: Hands-on "Breakdown Challenges" and "Extraction Templates" to ensure learners are actively "doing" rather than just observing.

Peer Coaching: Group work using "Learning Personas" to simulate real-world needs analysis.

Resources needed:

Digital: Projector/Smartboard for presentations, internet access for researching nationally recognized training products (e.g., training.gov.au).

Documentation: Copies of the "Extraction Template," "Compliance Checklist: Intellectual Property, Copyrights & Branding," and a sample "Organisational Procedure" checklist. Handouts and cards for activities. E-Learning "Interaction Menu".

Activity Materials: Whiteboard markers, butcher's paper for brainstorming, and "Exit Tickets" for the final review.

Visual presentation slides full of branding and IP errors for the "Spot the Violation" task.

Learning Support

Individualized Feedback: Provide constructive, immediate feedback during practical tasks, particularly for Sian, who relies on feedback for confidence.

Structured Theoretical Frameworks: Establish clear theoretical foundations before moving to practice to support Shammim's "Thinking" and "Applying" learning styles.

Multimodal Instructions: Provide instructions in both oral and written formats with clear examples to support all learners, especially Abbey's kinaesthetic preference.

Learning Environment

Collaborative Layout: Arrange seating in small groups or clusters to facilitate the "Group work needs analysis" and "Unit Breakdown Challenge".

Safe Space for Reflection: Create an environment where learners feel comfortable sharing "Failed Course" experiences and bad e-learning examples without judgment.

Resource-Rich: Ensure easy access to physical templates and digital research tools to allow for self-directed exploration.

Session Structure and Timings

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary

Time	Topic / Activity	Content / trainer instructions	Learning Activities / Formative Assessments	Resources
1h	**Who & Why?** Defining the Scope	**Trainer** Introduces the session and defines why a clear purpose is the "anchor" for design**.**	**Learners engage in discussion** "The Failed Course." Share experiences of bad e-learning. What was missing? Identify why a clear purpose is the "anchor" for design.	PPT Presentation Whiteboard and projector
1h 30mins	Know Your Learner: Characteristics & Needs	**Trainer** Presentation on understanding learner characteristics and identifying foundation	**Learners** **Hands-on Task:** Groups perform a needs analysis using a peer as a "learning persona."	PPT for presentation Learning Personas Cards Set of questions (handout)

		skills/learning support.	Trainer provides examples of “Learning Personas” (cards), structured set of questions and forms the pairs. Learners take turns to interview their peer using the structured set of questions focusing on four key areas: Technical environment, educational background, learning preferences and potential barriers. Once the data is gathered, the "Consultant" must identify the Foundation Skills required for this specific person to succeed in an e-learning environment.	
	Analysing the	**Trainer**	**Learners** must complete the	Training.gov.au access,

1h 30mins	Unit	Discusses and demonstrates how to access and interpret nationally recognized training products.	activity: Unit Breakdown Challenge. In this activity, learners move from the "Who" (the learner persona) to the "What" (the training requirements). They are given a specific Unit of Competency (UoC) from training.gov.au and must strip find the raw skills and knowledge that must be taught and assessed. Trainer provides an extraction template divided into three buckets: The "Do" Bucket (Performance Criteria) The "Know" Bucket (Knowledge Evidence)	Extraction Template A digital or printed table with columns for PC, KE, PE, and "E-learning Translation."

			The "Context" Bucket (Performance Evidence) Finally, learners take one item from their "Do" bucket and brainstorm how to move it into a digital format.	
1h	The Compliance Checklist	**Trainer** Explains IP, Copyright, Branding, and organizational procedures in e-learning.	**Learners' group activity:** **Brainstorming:** Review a sample "Organisational Procedure" checklist. Discuss why branding and IP are non-negotiable. The goal is for learners to realize that even the best pedagogical resource is unusable if it violates Intellectual Property (IP) law or fails to meet organizational branding standards.	PPT presentation Sample Organisational Procedure Checklist: A 1-page document outlining mock branding and legal rules. **"The Bad Slide"**: A visual presentation slide full of branding and IP errors for the "Spot the Violation" task.

			This activity builds the "Compliance Mindset" required before the actual design begins. **Trainer** provides a Sample Organisational Procedure Checklist. Spot the violation: Trainer displays a sample e-learning slide that is intentionally "bad." It could have: A pixelated logo from Google Images (IP violation). Three different fonts that aren't in the brand guide. A "borrowed" comic strip from a famous artist without	Infographic: A simple visual guide explaining different Creative Commons Licenses, so learners know how to attribute assets correctly.

			attribution. A video of a famous song without attribution. Learners must use their checklist to identify all the procedural and legal errors.	
45mins	Design Project Kick-off	**Trainer** Introduction of Summative **Assessment:** Portfolio 1 and the design process requirements.	**Learners** Practical Start: Begin the design process for 2 different e-learning resources. Trainer provides the “Interaction Menu” + topics handout.	Portfolio 1 Template Digital Doc E-Learning "Interaction Menu": A cheat sheet showing different digital activity types (hotspots, accordions, sorting activities) to inspire designs. Topics handout
15mins	Review and	**Trainer**	**Learners**	Teams or Zoom polling
