GROUP TRAINING PLAN

Learner/s: *First name and initial only*	Shammim B. Abbey T. Sian B
Qualification Code and Title:	**TAE50122 Diploma of Vocational Education and Training**
Entry Requirements:	Those entering this qualification must demonstrate current VET skills and knowledge relevant to the specialisation chosen in this qualification.
Specific requirements of the qualification as per the Companion Volume:	Those entering this qualification must demonstrate current VET skills and knowledge relevant to the specialisation chosen in this qualification. The TAE50122 Diploma of Vocational Education and Training requires individuals with advanced skills and knowledge to train and assess in the VET system, design and develop approaches to learning and assessment strategies, and provide mentoring, guidance and advice to entry-level trainers or assessors.
Unit Code and Title:	Unit 1: TAEDEL511 Facilitate e-learning Unit 2: TAEDES513 Design and develop e-learning resources
Pre-requisite units:	**PREREQUISITE UNIT** TAEASS412 Assess competence TAEASS413 Participate in assessment validation** TAEDEL411 Facilitate vocational training** TAEDES411 Use nationally recognised training products to meet vocational training needs (or its previous version TAEDES402 Use training packages and accredited courses to meet client

	needs)
Licensing and Regulatory Requirements:	No licensing, legislative, or certification requirements apply to these units at the time of publication

Section 1

Complete this section in relation to the learner group.

A summary of the learners' characteristics (including diversity and accessibility) as relevant to this training session.
The learner group for this qualification is highly qualified and professionally diverse, with ages and backgrounds reflecting a mix of technical, scientific, and creative industries. They are generally high-achieving individuals looking to formalize their experience or transition into leadership and training roles. **Education & Experience** The cohort includes a Master's degree holder and several with Bachelor's degrees or specialized vocational certificates. Experience ranges from an Assistant Professor in Computer Science to a Veterinary Nurse and a Music Performance graduate. All learners aim to improve their leadership, communication, and technical skills to secure stable employment or management positions. **Learning Needs & Accessibility** Preferred Styles: There is a strong consensus for Thinking and Applying. Learners value logical theory followed immediately by hands-on practice. Support Requirements: No physical or cognitive disabilities were disclosed. While literacy and numeracy are generally strong, some learners may need occasional support with writing tasks or maths. Work-Life Balance: All participants are balancing full-time or part-time work and family commitments, meaning they require efficient and flexible training delivery.

Individual Snapshots Shammim: Highly technical background (CS Master's) with international teaching experience; focused on Australian workplace integration. Abbey: Multi-modal learner with a science background; seeking to transition from technical vet nursing to leadership roles. Sian: Creative background (Music/Ministry) who prefers structured, logical instruction and practical application.
A summary of the learners' needs as relevant to this training session.
Learner Needs: All learners require flexibility due to commitments such as full-time work (Shammim) , family responsibilities (Sian) , and existing VET roles (Abbey). There is a collective need for practical, "real-world" applications and feedback to build confidence.
A summary of the learners' expectation as relevant to this training session.
All three learners expect to gain advanced digital facilitation skills, improve their collaborative and communication abilities, and achieve industry-ready competency to move into leadership and instructional design roles.

Section 2

Complete this section in relation to the industry sector the group belongs to.

Outline the technical skills employees need in this sector, now and in the future.

Proficiency in Learning Management Systems (LMS) and e-learning authoring tools. Ability to design for both synchronous and asynchronous environments. Knowledge of universal design principles and digital accessibility standards.
Outline the soft skills employees need in this sector, now and in the future.
Advanced communication and collaboration skills for remote teamwork. Problem-solving in technical environments and adaptability to new technologies. Leadership and mentoring within a VET context.
Explain how the above information informed your choice of training product.
The units TAEDEL511 and TAEDES513 were selected because they directly address the learners' goals of becoming e-learning consultants or instructional designers while meeting the industry's demand for high-quality, flexible digital training solutions.

Section 3 and Section 5 (UNIT 1 and UNIT 2)

Complete this section in relation to the training methods and resources you will be using during your training sessions.

List the training resources you will be using.
Training.gov.au / VET Net: For units of competency and companion volumes . TTAE LMS: Hosting modules and submission portals . Mayer's Multimedia Principles: Theoretical framework for visual design . Digital Templates: Extraction templates, e-learning shells, and "Design Approach" documents . Formative Assessment Tools: "The Glitch Hunt" practice site, "Engagement Audit" recordings, and scenario-based role-plays. Other tools: Canva, H5P, authoring tools, Vyond
Where and how did you access these resources?
Web Browsers (Google): Accessed the national VET database and industry research sites Institutional Access: Logged into the TTAE Learning Management System (LMS) and internal organizational shared drives. External Libraries: Sourced educational psychology principles (Andragogy and Cognitive Load Theory) via academic and VET design websites.

Why did you choose these specific resources?
Compliance: Ensures all training aligns with Standards for RTOs 2025 and specific unit requirements. Learner Preference: Matches the cohort's preference for "Thinking and Applying" through hands-on templates and logical theory . industry Relevance: Prepares learners for "real-world" digital facilitation and instructional design roles
List the physical resources/equipment you will be using.
Hardware: Laptops/PCs with stable internet, webcams, and microphones. Software/Apps: MS Teams/Zoom (Breakout rooms), Google Workspace, and e-learning authoring tools. Classroom Materials: Physical sticky notes (for "The Deconstruction Challenge") and whiteboards for face-to-face sessions
Where and how did you access these resources?
Personal/Employer Supply: Laptops provided by learners or their workplaces. TTAE Facilities: Physical workshop space and internet connections provided during face-to-face sessions. Cloud-based Subscriptions: Accessed via institutional logins for MS Teams, Zoom and Google Workspace. Also authoring tools free basic subscriptions were provided by

learners.
Why did you choose these specific resources?
Accessibility & Flexibility: Supports the learners' need for blended delivery due to full-time work and family commitments. Authenticity: Uses the exact electronic tools and environments (LMS/Virtual Classrooms) that learners will use in their future VET roles.

Section 4 and Section 6

Complete the delivery plan for the unit chosen. The delivery plan must comprise of a **minimum of three (3) sessions**.

Unit 1 – TAEDEL511 Facilitate e-learning

Session 1: *Mastering the Digital Classroom: A Guide to Facilitating E-Learning*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	6 hours	
Mode of delivery	Blended (synchronous session with asynchronous follow up)	
Learning outcomes	*By the end of the training session learners will be able to:* • *Test e-learning hardware and software to identify and resolve technical glitches before a session starts or/and during a session.* • *Draft a clear set of digital classroom rules (protocols) that follow privacy and safety laws.* • *Facilitate an online group activity using chat and breakout rooms to help students feel included and connected.*	
Key topic / activity	**Learning activities / Formative assessments**	**Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered**
1. The tech check	Housekeeping-WHS	**PC 2.1** Confirm technical requirements for the e-

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	Group discussion (Formative) Topic: What is the worst tech disaster you've seen in a classroom, and how did it affect the learners? **Activity:** "The Glitch Hunt." Learners log into a practice site (Zoom or Teams) and try to find common mistakes (like a silent video or a dead link). They must then fix or/and report them.	learning environment. **PC 2.2** Trial and check e-learning resources and materials for technical glitches **KE:** E-learning tools.
2. The Digital Rulebook	Discussion protocols for e-learning environments **Activity:** "Drafting the Law." In small groups, learners create a 5-point "Classroom Contract". This must include: Privacy, Academic Integrity, Safety and inclusivity.	**PC 2.3** Develop and document protocols for the e-learning environment according to legislative and regulatory requirements. **KE**: Legislative & VET regulatory requirements. **AT1**: Short multiple-choice quiz: Assessment Condition 3
3. The Engagement Lab	**Small Group Activity:** "Chat & Breakout Challenge." Learners take turns being the teacher. They must start a chat discussion and move students into breakout rooms for a quick icebreaker.	**PC 3.2** Establish e-learning relationship with e-learners **PC 3.3** Initiate relationships between e-learners that support inclusivity, acknowledge diversity and enable a positive e-learning environment.

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
		PC 4.1 Use electronic tools to facilitate e-learning according to the e-learning training plan **PE**: Moderate chat and manage breakout groups.
5. Solve the Problems	**Activity:** "Tech vs. Content." Learners are given 5 "Help Me!" messages from fake students. They must sort them into "Technology Fix" or "Lesson Help" piles and reply appropriately	**PC 4.3** Use support mechanisms to address technical issues **KE**: Distinguish between technical and content problems. Learner support.
6. Exit ticket	**Activity:** "Reflect & Improve." Learners use a simple checklist to grade their own performance and pick one thing they will do better next time.	**PC 6.1** Seek e-learner feedback according to organisational procedures. **PC 6.2** Analyse own practice of facilitating e-learning and identify opportunities for improvements **KE**: Review and reflect on own practice

Unit 1 - Session 2: *Setting the Digital Stage: Preparing for E-Learning*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	6 hours

Mode of delivery	Blended (Face-to-face in person session: Theory and directions + interactive digital workshop: Practice doing)	
Learning outcomes	*By the end of the training session learners will be able to:* *-Check organization rules and training strategies for e-learning.* *-Plan a logical flow of digital activities and manage risks.* *-Identify when and how to get extra support for student literacy or digital skills*	
Key topic / activity	**Learning activities / Formative assessments**	**Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered**
1. The Rules Reviewing Org procedures, the TAS, and the Unit of Competency.	**Discussion:** "Before we click 'start,' we need to know the rules. Where do we find our organization's e-learning policy? Why is it vital to know who our target group is before designing the course?	**PC: 1.1:** Access organisational procedures to confirm e-learning procedures relevant to job role **PC 1.2** Access training and assessment strategy and identify purpose, target group, learning resources and requirements for e-learning **PC 1.3** Access and analyse nationally recognised units of competency and identify the standard of performance required in the workplace

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
		KE: Regulatory requirements
2. Creating the Learning Map	**Discussion**: "E-learning can feel lonely. How do we sequence activities, so they flow logically and keep the student moving forward? What happens to a student's progress if the content is out of order or too jumpy?"	**PC 1.4** Develop e-learning training strategies to manage and sequence e-learning activities and events, to ensure logical **KE:** Learning theories **AT2: Class exercise creation of a short e learning training plan** Sequencing activities into a logical "Learning Path." **The Goal:** To develop an e-learning training strategy that manages and sequences activities to ensure a logical progression of content and learner progress
3. Spotting Red Flags	**Discussion:** "Let's talk about 'What Ifs.' What technical or personal constraints might stop a student from succeeding? How do we spot a risk to a learner's wellbeing in a digital space compared to a classroom?"	**PC: 1.5** Identify and assess constraints and risks to e-learning

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	Technical Constraints: **Hardware/Software:** Does the learner have a device that meets the technical requirements of the e-learning environment? **Internet Stability:** Will a poor connection prevent them from attending a synchronous (live) 1-hour session? **Digital Literacy:** Does the learner have the "Digital Literacy" foundation skills to use the electronic tools and navigate the learning objects? **Personal Constraints:** **Time & Space:** Does the learner have a quiet, safe environment at home or work to focus on e-learning? **Work/Life Balance:** Are there workplace	**KE**: Risks to wellbeing **AT1:** Scenario based question: The Learner Support & Intervention Plan

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	pressures or personal commitments that limit their "continuity of progress"? **Risks to Learner Wellbeing** The "Silent" Learner Tone Shifts Inappropriate Behaviours	
4. The Safety Net	**Discussion:** "Not everyone is a digital native. How do we identify if a student needs help with basic computer skills or literacy? When is a problem 'out of our hands,' and where do we go to find specialist support for them?" **Activity:** Scenario based: Identifying LLND and specialist support needs.	**PC: 1.6** Identify and organise required support for foundation skill and learning needs within scope of own job role; and access specialist support where required. **KE:** Support strategies
5. Exit ticket	**Discussion:** "Look back at your plan. Does it meet the national standard of performance required in the workplace. Are you ready to move from 'Preparing' to actually 'Setting up' the environment?"	**PE:** Facilitate e-learning sessions

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	Activity: Final review of the e-learning training plan. Reflect and improve checklist	

Unit 1 - Session 3: *Mastering Dynamic E-Learning Facilitation*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	6 hours
Mode of delivery	Blended (Synchronous session with Asynchronous Pre-work/Follow-up)
Learning outcomes	*By the end of the training session learners will be able to:* • *Apply advanced e-learning facilitation techniques to maintain learner engagement and momentum.* • *Integrate authentic learning opportunities and formative assessment into digital delivery.* • *Monitor learner progress and intervene effectively to support diverse needs*

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
1. Engagement Techniques in E-Learning	**Discussion:** Shifting from "presenting" to "facilitating". The core focus is on how to use e-learning facilitation techniques to maintain a productive and inclusive experience for every learner. **Activity:** "The Engagement Audit." Learners review a recorded session and identify three points where learner momentum could be increased using electronic tools.	**PC 4.2:** Use e-learning facilitation techniques to ensure a productive experience. **PE:** Moderate chat functions and manage breakout groups. **KE:** Techniques for learner inclusion and engagement.
2. Designing Authentic Learning & Practice	**Discussion:** What is Authentic learning, moving beyond simple quizzes. How to design learning objects for e-learners can practice the actual standards of performance required in their industry.	**AT1:** Real workplace scenario: "Real-World Object Build." Learners design one small and simple learning object that reflects a real workplace task. **PC 4.4:** Build opportunities for authentic learning, practice, and formative assessment. **PE:** Deliver vocational training using products that are nationally recognised.

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
		KE: Design and development of learning objects for e-learning facilitation.
3. Monitoring & Intervening for Momentum	Activity: "Scenario Role-Play." Learners are given a simulation of a "quiet" asynchronous forum and must draft an intervention post to re-engage the group.	**PC 5.3:** Monitor e-learner interaction and intervene where necessary to maintain momentum. **PE:** Facilitate at least one asynchronous e-learning session. **KE:** Behaviours that may indicate learner difficulties.
4. Exit ticket	Summative Assessment: The "Authentic E-Learning Module "demonstrate how you built in at least two opportunities for "authentic learning" (tasks that mimic real-world workplace performance).	KE:This task evaluates your ability to build opportunities for authentic learning and practice into the e-learning experience.

Section 4 and Section 6

Complete the delivery plan for the unit chosen. The delivery plan must comprise of a **minimum of three (3) sessions**.

Unit 2 - TAEDES513 Design and develop e-learning resources

Session 1: *Foundations of E-Learning Design: Getting Started*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	6 hours	
Mode of delivery	Face-to-face	
Learning outcomes	*By the end of the training session learners will be able to:* • *Clarify the purpose and mode of delivery (synchronous/asynchronous) for a specific e-learning resource.* • *Analyse target group characteristics to identify foundation skill and support needs.* • *Interpret nationally recognized training products to extract core skills and knowledge requirements.* • *Apply organizational procedures, including branding and intellectual property requirements, to the preparation phase.*	
Key topic / activity	**Learning activities / Formative assessments**	**Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered**
1. **Who & Why?** Defining the Scope	**Discussion:** "The Failed Course." Share experiences of bad e-learning. What was missing? Identify why a clear purpose is	**PC: 1.1** Identify and clarify purpose, target group and mode of delivery relevant to learning resource

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	the "anchor" for design.	design **KE:** Purpose & Target Group
2. Know Your Learner: Characteristics & Needs	**Discussion:** If we don't know who is sitting on the other side of the screen, are we designing a "learning resource" or just a "digital obstacle course"? **Hands-on Task**: Groups work needs analysis. Use one of your peers as a "learning persona"	**PC: 1.2** Analyse target group characteristics and identify their foundation skill and learning support needs relevant to e-learning resource design **KE:** Target group characteristics
3. Analysing the Unit	**Activity:** Unit Breakdown Challenge. Use a simple "Extraction Template" to pull the must-have skills, knowledge, and "real-world" tasks (Dimensions of Competency) from a Unit of Competency. **Goal:** Identify exactly what the learner needs to do so you can design the right e-learning activities to match.	**PC: 1.3** Access and analyse nationally recognised training products to identify the skills and knowledge requirements **KE:** VET regulatory requirements

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
4. The Compliance Checklist: Intellectual Property, Copyrights & Branding	**Brainstorming:** Review a sample "Organisational Procedure" checklist. Discuss why branding, IP, and copyright attribution are non-negotiable.	**PC: 1.4** Identify organisational procedures for designing and developing e-learning resources **KE:** IP, Copyright, & Org procedures
5. Exit ticket	Review and improve	**AT (summative)** Portfolio 1: The Design Project: Begin the design process for 2 different e-learning resources

Session 2: *From Vision to Visuals: Designing Impactful E-Learning Resources*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	6 hours
Mode of delivery	Face-to-face in person session with hands on workshop
Learning outcomes	*By the end of the training session learners will be able to:* • *Select e-learning design options aligned with specific target groups and delivery modes.*

	• *Apply Mayer's Principles of Multimedia Learning to create effective visual learning opportunities.* • *Analyse and sequence skills into manageable, logical learning sessions.* • *Document a comprehensive e-learning design approach for stakeholder confirmation.*	
Key topic / activity	**Learning activities / Formative assessments**	**Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered**
1. The Design Landscape	**Discussion:** Comparing synchronous vs. asynchronous design needs. Brainstorming how target group characteristics (AQF level, digital literacy) dictate design choices.	**PC: 3.1** Review and select options for e-learning resource design appropriate for purpose, target group, mode of delivery and required skills and knowledge **KE:** Target group characteristics
2. Mayer's Principles & Visuals	**Hands-on Workshop:** Participants experiment with digital tools to create a visual "hook" (e.g. infographic, image etc) **Theory Focus:** Applying Mayer's Coherence (exclude weed), Signalling	**PC: 3.2** Experiment with traditional and digital methods to create required visual learning opportunities **KE:** Visual design options

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	(highlighting), and Spatial Contiguity (labels near images) principles.	
3. Chunking & Sequencing	**Activity:** "The Deconstruction Challenge." Take a Unit of Competency and break it into "manageable sessions." Use a wall of sticky notes to sequence them for learner progression.	**PC: 3.3** Analyse and break required skills and knowledge into manageable sessions and arrange and sequence the sessions to support learner progression **KE:** Structure of products
4. The Design Strategy	**Discussion:** Mayer's Segmenting & Pre-training Principles **Segmenting Principle:** Humans learn better when information is broken into bite-sized, user-paced segments rather than a continuous flow. **Pre-training Principle:** Learners absorb complex animations or visuals better if they already know the names and characteristics of the main concepts.	**PC: 3.4** Document and confirm the e-learning resource design approach **KE:** Determining sequences **AT 1** Portfolio 2: The E-Learning Design Blueprint, submit a written Design Approach document.

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	Activity: Drafting the "Design Approach" Document	
5. Assessment Prep & Review	**Simulated Review:** Checking designs against legislative requirements (Copyright/Creative Commons) and universal design principles.	**KE:** IP/Copyright, Universal Design **AT 2:** Knowledge Quiz (Mapped to KE) A short-answer quiz

Session 3: *From Design to Digital: Developing High-Impact E-Learning Materials*

Provide a breakdown of each topic you will cover in the session. Please add or delete rows as necessary.

Duration	6 hours
Mode of delivery	Face-to-face in person session with hands on workshop and digital device access.
Learning outcomes	*By the end of the training session learners will be able to:* • *Develop structured e-learning course shells and content templates using classification techniques.* • *Create interactive media components and activities that progress and engage learners.*

	• *Apply Mayer's Multimedia Principles and Cognitive Load Theory to digital content development.* • *Produce guidance materials for trainers and maintain required administrative registers.*	
Key topic / activity	**Learning activities / Formative assessments**	**Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered**
1. The Science of Seeing: Mayer's Principles	**Theory Presentation**: Applying Mayer's Principles (Coherence, Signaling, Redundancy) to e-learning templates . **Activity:** Audit a "bad" slide/page and redesign it using a content template.	**PC 4.1** Develop course content shell, interactive media components, sequences, interactivity and content templates, **PC 4.2** Develop e-learning material content and activities to progress, support and engage learners **KE** (Visual design)
2. The Blueprint: Course Shells & Hierarchy	To design an effective e-learning environment, you must move from a broad idea to a structured digital map. This involves building the "shell" (the outer framework) and organizing the "inventory" (the internal content) so learners don't get lost. **Discussion:** "Intuitive vs. Frustrating"	**PC 4.1** Develop course content shell, interactive media components, sequences, interactivity and content templates, **PC 4.4** Use classification techniques to develop content inventory and detail levels of hierarchy **KE** (Content Inventory)

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	Think of a website or app you hate using. Is the menu hidden? Is the "next" button hard to find? **Activity:** Group work Developing a course content shell for your unit.	
3. Interactivity & Asynchronous Tools	**Hands-on:** Develop one interactive component (e.g., drag-and-drop etc) and embed a digital tool (eg a self-marking quiz) for self-paced learning.	**PC 4.1** Develop course content shell, interactive media components, sequences, interactivity and content templates, **PC 4.2** Develop e-learning material content and activities to progress, support and engage learners , **PC 4.3** Embed digital e-learning tools for asynchronous learning **PE** (Asynchronous resource) **AT1** Portfolio 3: The Resource: Develop a content learning object using a content creation tool
4. The Guide: Supporting the Trainer	**Activity:** Draft a "Trainer Guide" snippet for the developed resource, detailing how	**PC 4.5** Develop e-learning training material content

Key topic / activity	Learning activities / Formative assessments	Performance criteria (PC), Performance Evidence (PE), Knowledge evidence (KE) covered
	to support learners and technical troubleshooting.	to guide VET teachers, trainers and assessors **KE** (Guidance for VET teachers)

Section 7 (Unit 1 and Unit 2)

Complete this section in relation to the overall Group Training and Delivery Plan.

List the legislative requirements you considered when developing your plan (e.g. Anti-discrimination).
Consideration of the Disability Discrimination Act 1992 to ensure e-learning resources are accessible to all learners.
List the regulatory requirements you considered when developing your plan (e.g. training package requirements, access and equity)
Alignment with the Standards for RTOs 2025 to ensure training package requirements are met and assessments are valid.
Describe how you considered learning theories and adult learning principles when developing your plan.
Use of Adult Learning Principles (Andragogy) by incorporating learners' prior experiences and providing self-directed, goal-oriented activities.
Describe how you considered the environment and sustainability when developing your plan.
Use of digital tools to reduce paper waste and leveraging cloud-based platforms to minimize the carbon footprint of physical travel.

List the TTAE (The Training Academy of Excellence) policy and procedure you followed to document this plan
TTAE Policy & Procedure Compliance • Training and Assessment Strategy (TAS) Policy: Guided the alignment of session plans with the overarching course structure and industry requirements. • Assessment Validation Procedure: Followed to ensure all planned activities and tools meet the principles of assessment and rules of evidence. • Document Control Policy: Applied through standardized naming conventions, version numbering (e.g., v1.0), and secure cloud storage protocols. • Continuous Improvement Procedure: Utilized for incorporating stakeholder feedback and industry trends into the plan's design. • Academic Integrity Policy: Ensured all sourced materials and training resources are correctly attributed and compliant with copyright laws. • Work Health and Safety (WHS) Procedure: Followed to identify and mitigate potential risks within the virtual and physical learning environments.
List the main features of the digital tools and electronic applications you used to help you develop this plan
Digital Tool & Application Feature List • **Google Workspace (Docs, Slides):** Real-time **synchronous editing**, version history tracking, and cloud-based collaborative drafting.

- **VET Net:** Searchable database for **National Training Packages**, ensuring alignment with current competency standards and units of competency.
- **VET Net Companion Volume:** Specialized **implementation mapping**, providing detailed industry context and assessment requirements for trainers.
- Research was conducted using Google web browser and website training.gov.au
